[Report - Children's Wellbeing in a Digital World – 2022...](#)

Internet Matters in partnership with University of Leicester and Revealing Reality have released a new report in relation to digital technology and wellbeing which shows 'striking differences between children of different ages, genders and demographic backgrounds. There are some interesting key findings...

- While displaying some positive impacts, greater social media use, especially among girls, was associated with increased negative impacts on wellbeing.
- Vulnerable children experience more of the negative impacts of digital technology on wellbeing than their less vulnerable peers.

You can read the full report [HERE](#).

[Instagram Accounts being Hijacked...](#)

A concerning new tactic is to send a message to an Instagram user stating that a recent posted photo contains copyright material. In order to appeal, you have to click a link in the message, input your username/password and appeal the copyright claim. At each stage, the message and design is very much Instagram. **This as a phishing scam**. Once the offender has the user credentials they hijack the account and demand money.

To read more click [HERE](#), there are screenshots on the page that may help you to highlight this with students.
